TRAINING SCHEDULE

CERTIFIED IN THE GOVERNANCE OF ENTERPRISE IT (CGEIT)

Overview:

The Certified in the Governance of Enterprise IT (CGEIT) training program is designed to provide IT professionals with the knowledge and skills required to effectively govern and manage enterprise IT. The program covers the principles and best practices for IT governance, including strategic alignment, value delivery, risk management, resource management, and performance measurement.

Training Objectives: By the end of this training program, participants will be able to:

- Understand the principles and frameworks for IT governance
- Identify the key components of effective IT governance
- Analyze and manage IT-related risks
- Align IT strategy with business objectives
- Deliver value through effective IT management
- Implement IT governance frameworks and standards

Throughout the training program, participants will engage in a variety of learning activities, including case studies, group discussions, simulations, and hands-on exercises using IT governance frameworks and tools. The program is designed to provide participants with a comprehensive understanding of IT governance principles and best practices, as well as practical skills in implementing effective IT governance processes.

Targeted Groups:

- IT managers with governance responsibilities
- IT directors
- IT governance professionals
- IT consultants focusing on governance

- Professionals involved in IT governance and risk management
