CONTRACTING FOR CONSTRUCTION PROJECTS TRAINING

Overview:

The Contracting for Construction Projects training program is designed to provide legal professionals and construction industry professionals with an understanding of the legal and practical considerations involved in contracting for construction projects. The program will cover a range of topics, including types of construction contracts, risk allocation, change orders, and dispute resolution. Participants will learn how to effectively negotiate, draft, and manage construction contracts.

Objectives:

By the end of this training program, participants will be able to:

1. Understand the legal framework for contracting in the construction industry.
2. Identify the different types of construction contracts and their advantages and disadvantages.
3. Understand risk allocation and how to manage risks in construction contracts.
4. Understand change order management and the impact of changes on construction contracts.
5. Understand dispute resolution mechanisms and strategies for resolving disputes in construction contracts.

The training program will include lectures, case studies, group discussions, and practical exercises. Participants will have the opportunity to apply the concepts learned in the training program to real-world construction contracting scenarios. By the end of the training program, participants will have a comprehensive understanding of the legal and practical considerations involved in contracting for construction projects, and will be equipped with the skills and knowledge required to effectively negotiate, draft, and manage construction contracts.

Targeted Groups:

- Construction project managers
- Contract administrators in construction
- Legal professionals handling construction contracts
- Procurement specialists focusing on construction projects
- Engineers involved in contract management
